

## ***FUTURE APPLICATIONS OF BURNING WOOD WASTES IN THE EXAMPLE OF MOSCOW REGION***

*Ivan Bacherikov, Mstislav Simonenkov, Andrei Pashkov, Boris Lokshantov*

### **ABSTRACT**

*This article describes the methods of disposal of wood wastes. The technology of preparation of the waste for burning is described. Storage of wastes by the closed method is proposed. Calorific characteristics of different species of wood are given. Moscow region is considered in terms of development of bio-energy.*
