Dear Colleagues,

We are pleased to present Volume 11 of the International Scientific Journal “Wood, Design & Technology”.

This volume contains 11 papers s related to fields wood construction, plywood, wood based panels, hydro-thermal wood processing, furniture design, visual communication through perspective, concept of staircases, light as a building material and business ethic and ethical behavior at workplace.

We try to make decisions about publications and we are grateful to the reviewers who provide their expert opinions generously and promptly.

This journal would not be possible without the great support of the Editorial Board members, and we would like to express our sincere gratitude for that to all of them.

We also thank all of the authors for contributing with their papers to this issue.

It is our hope that this collection of papers will be interesting for people in furniture industry and product design and will stimulate further research into the varies areas of researching.

Being the only journal in Republic of North Macedonia which joins a variety of researching disciplines in wood technology and design of furniture and interior, disciplines which are basically so closely connected in practice, it is open to the authors from all over the country, as well as to our colleagues from abroad.

With sincere regards,

Prof. dr.Goran Zlateski
