P r e f a c e

Dear Colleagues,

We would like to present with great pleasure, the creation of a Volume 12 of the International Scientific Journal „Wood, Design & Technology”. This journal was established in 2012, and believe that it will be well accepted and has an assured future.

The Journal is intended as a forum for practitioners and researchers to share their techniques and solutions in wood sector.

It has always been important goal to combine wood science and technology with furniture and interior design. Therefore, this journal was founded to represent the growing needs of scientific effort as an integral part of development of wood industry at all. Furthermore, the idea of this journal is to bridge the gap between these three domains of knowledge, Wood, Design and Technology and to offer the common possibility of publishing current results of research work and efforts in innovations.

We try to make decisions about publications as quickly as possible, and we are grateful to the reviewers who provide their expert opinions generously and promptly.

In this volume of the journal, we are pleased to publish 10 papers.

This journal would be not possible without the great support of the Editorial Board members, and we would like to express our sincerely thanks to all of them.

We also thank all of the authors for contributing the papers for this issue.

It is our hope that this collection of papers will find interest among people in wood industry and will stimulate further research into the varies areas of researching.

As the only journal in Republic of North Macedonia to join varies disciplines in wood researching which are so closely connected in practice, it is open to the authors from around the country, as well as to our colleagues from abroad.

With sincere regards,

Prof. dr.Goran Zlateski

Editor-in-Chief
