

COMPARATIVE ANALYSIS: BULGARIAN FURNITURE FROM THE EARLY RENAISSANCE AND WORLD EXAMPLES UP TO THE PRESENT

Aleksandrina Parvanova

ABSTRACT

During the early period of the Bulgarian National Revival, there is an emergence of forms of furniture that we use as a basis even today in current styles. The aim of the research is to demonstrate, through a comparative analysis, the development of these original structures. The models pass through certain changes in time and habitat, but the idea has always remained as a basis. In linear silhouette precise examples are displaced from Bulgarian furniture heritage and world-wide famous models of the furniture development.
